

# **Instruction for the TP-Link Smart Plug & Adapter 1450 Cable**

## **Step 1**

Please read the instruction file for the Track assembling and Remote Control programming we have sent to your email. Do NOT plug in the Smart Plug in this process.

## **Step 2**

Once the track is working with the Remote Control, plug in the Smart Plug to the wall outlet. Download the APP "Kasa" on your Smart Phone and connect the Smart Plug. Please read the TP-Link instruction in the package for details.

## **Step 3**

Once the Smart Phone and Smart Plug are connected, Plug in the Adapter 1450 RJ11 cable to the Motor 6-pin port. Plug in the Adapter 1450 power cord to the TP-Link Smart Plug. Watch this video: [video](#)
