

Installation Instructions for CL-920A

1. Testing the Carrier

- Hand move the Master Carrier back and forth the whole track a few times to make sure the Master Carrier travels smoothly along the track.

2. Programming the Motor

1-Channel Remote Control

- [View Instructions](#)

Multi-Channel Remote Control

- First select channel#, then read the same instruction file as above.
- Open and Close the Track completely a few times to make sure it works properly, and then remove the Power and Motor for mounting the Track.

3. Mounting Brackets

- Ceiling Mount: [View Instructions](#)
- Single Track Wall Bracket: [View Instructions](#)
- Dual Track Wall Bracket: [View Instructions](#)

Important Note

NEVER lift the track at one end that could deform the jointing. Whenever handling the track, make sure both sides of the track are supported & weight is balanced.
